ABOUT US

Western Australia based, but operated globally.

We provide safe and efficient marine inspection services with minimal impact or downtime. Our reports can deliver meaningful analysis of accurate and precise sensor data. We have a successful history of Remotely operated Vehicle (ROV) inspection, integrating the latest equipment to employ world-renowned techniques in innovative ways. With our knowledge, skills, and equipment, we eliminate diving incidents, and guarantee reduced costs, personnel, space, and delays. Planned maintenance schedules ensure all our equipment is safe and reliable.

TESTIMONIAL

"Focus Subsea provided a cost effective and very safe alternative for our jack up leg and spud can inspections while we continued unhindered with our day to day operations on location."

Decommissioning Package

Focus Technology Solutions has proven experience in subsea asset and infrastructure inspection. Our subsea inspection package delivered quick mobilisation, significant cost savings for inspection campaign in Australia and around the world.

Applications

- GVI & CVI of subsea pipeline, platforms and associated structures
- NDT on the subsea structures
- ☐ MBES imaging/profiling on subsea assets and seabed
- Marine growth survey
- Rotary brush/Water jetting for spot cleaning
- ☐ Sampling & environmental monitoring
- Pipeline burial detection

Benefits

- Proven reliable high performace ROVs
- Experienced in operating vehicles in harsh conditions and high current
- Compact containerised system with deck mounted crane
- Quick and simple mobilisation

Description

Typical decommissioning project equipment:

- · Seabed sample collector
- Marine growth sample collector
- Gas sample collector
- Manipulator skid
- CP/FMD/UTM
- MBES
- HP water jet/Cavi jet/rotary brush
- · Kevrek Crane
- 300m Umbilical & spare
